Notes:

Value Added Tax

Financial Services Providers - Products and Services List

December 2017

* Charges of a punitive nature must be interpreted in a narrow way and only applied to charges which are separate from the consideration for any product/service.

** Cost recoveries are third party fees for a supply made to the customer which are paid on behalf of the customer by the financing company and recovered from the customer. On this basis the monies recovered are not consideration for a supply by the financial institution. Cost recoveries may only be treated as outside the scope of VAT when they are incurred on behalf of the customer in this way. Any items incurred by the financing company in its own name, and subsequently charged on to the customer are subject to VAT at the rate applying to the underlying cost.

*** The VAT treatment in this document assumes the supplier and the customer are both established in the KSA and the transaction is not carried on in respect of any other establishment outside the KSA. VAT treatments may differ for cross-border transactions involving participants established outside of the KSA.

^ This applies only to international transactions since these charges are not allowed for transactions within the KSA

**** Banks and finance companies should look at the relevant fees and charges applied by them to their customers.

Disclaimer

This list of products is provided for information only and to help the banks, financial firms, and financial services sector for VAT readiness. This list does not include, or purport to include, all the relevant products, services, and fees, and should be read in conjunction with the KSA VAT law and Implementing Regulations as well as the financial services guideline (which will be released at a later date). This list is not binding on GAZT in respect of any transaction carried out and it cannot be relied upon in any way.
